# Flutter's Culture of Inclusivity

## Building an inclusive community

At our core as a project is the idea that everyone is welcome:  
whether you're a beginner or a seasoned expert;  
no matter what you're trying to build;  
whoever you are.

**You're welcome in the Flutter Community.**

[flutter.dev/culture](https://flutter.dev/culture)

### Be open

Three senses of openness: Open as in open minded, open as in accessible, and open as in Open Source.

### Be modest

Flutter developers are helpful and never look down on others. Together, we are building an inclusive community.

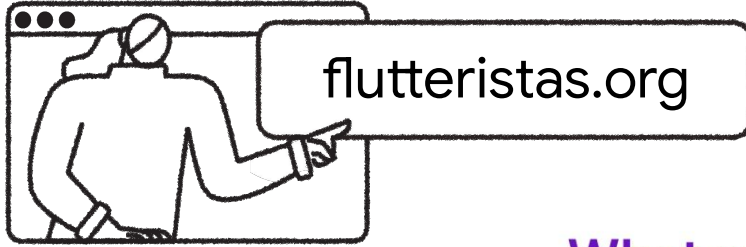

### Be respectful

Inclusive to the core. Our community is respectful of individuals and all of their choices.

#WTMDareToBe

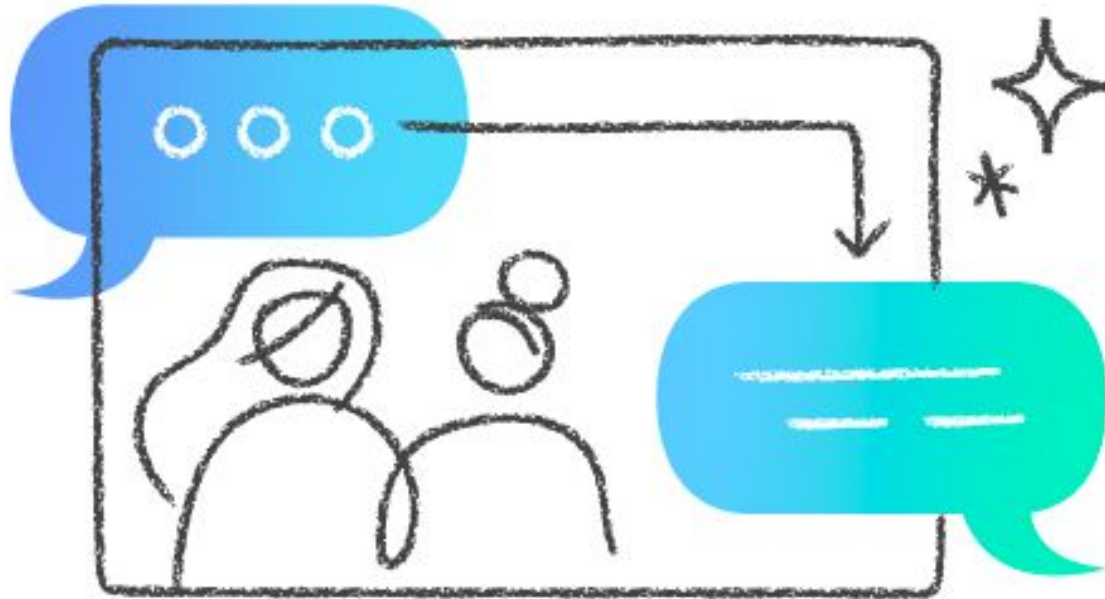

## What are the Flutteristas?

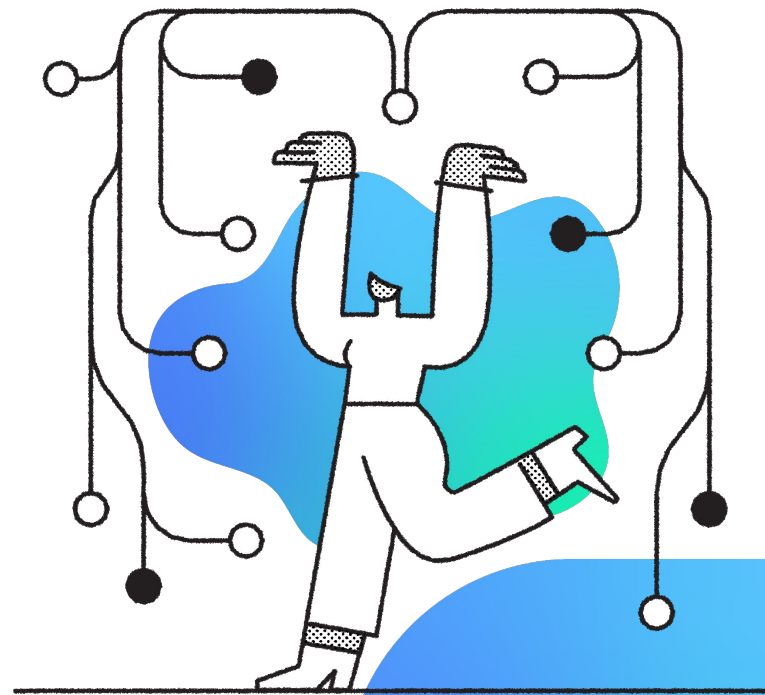

The Flutteristas is a world-wide community of people whose gender identity is either female or non-binary and have an interest in the Flutter SDK.

The Flutteristas have a monthly meeting which usually includes a presentation by Flutter Community member(s).
